

## Настройка драйвера NVIDIA

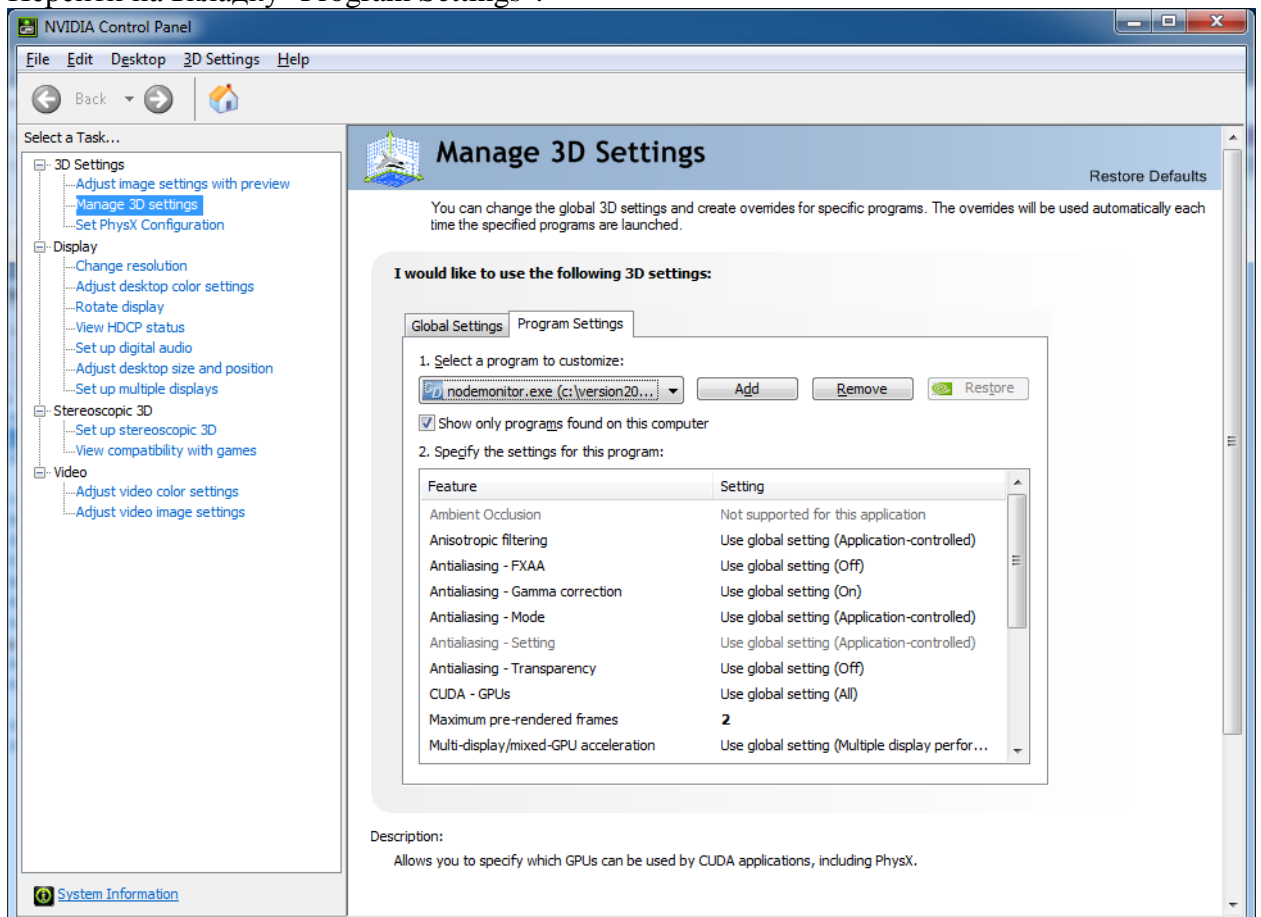

Открыть панель управления драйвером NVIDIA:

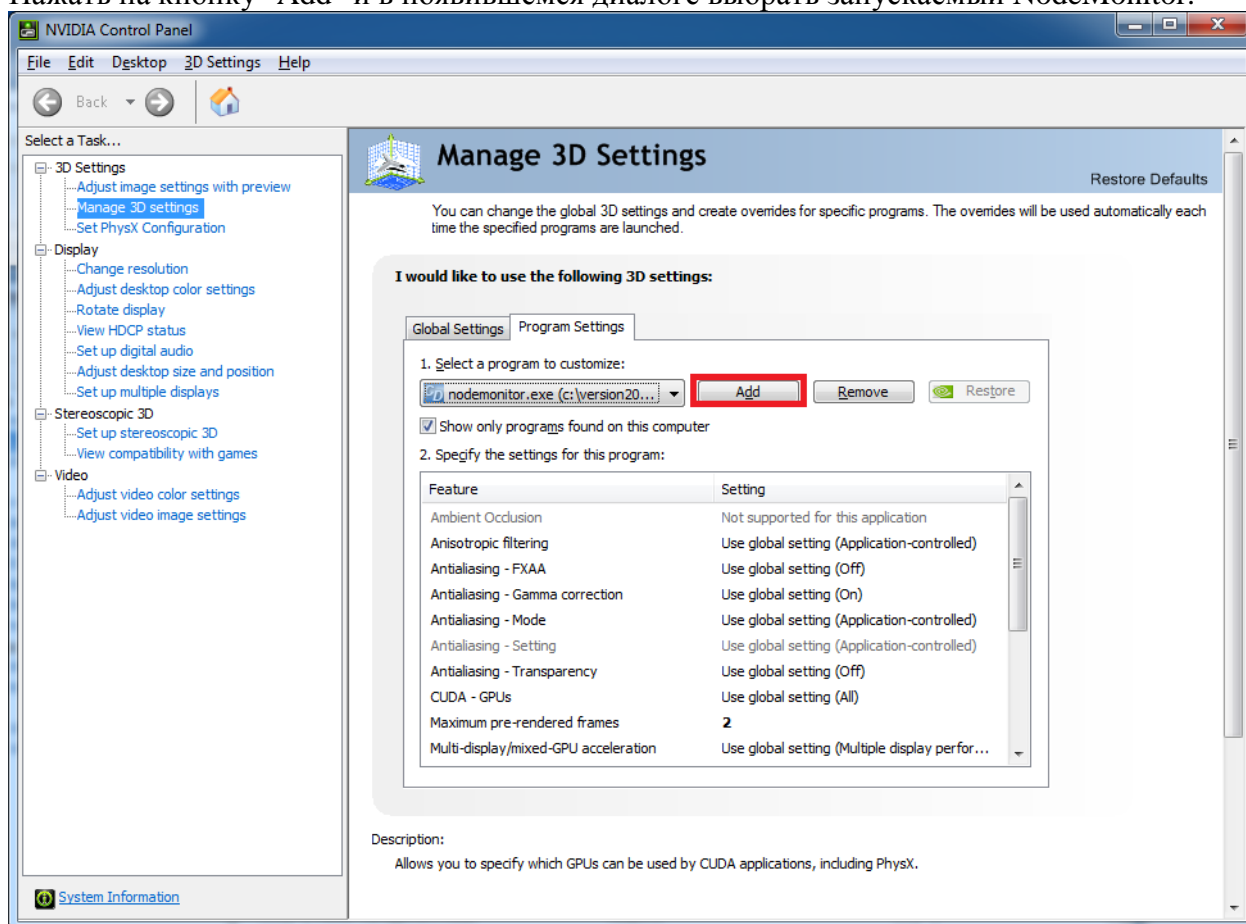

Нажать на "Manage 3D settings":

Перейти на вкладку "Program Settings":

Нажать на кнопку "Add" и в появившемся диалоге выбрать запускаемый NodeMonitor:

Далее необходимо выставить следующие настройки:

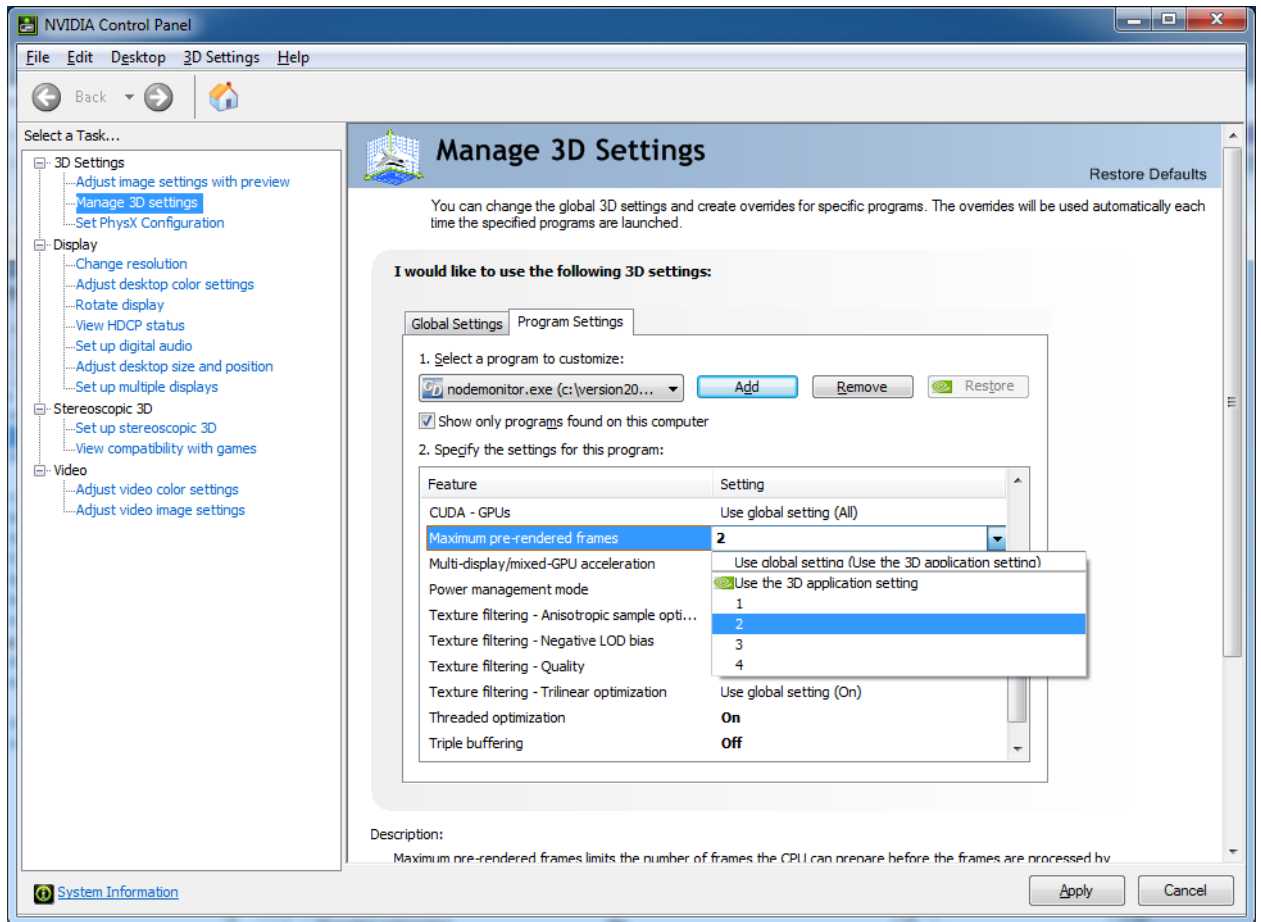

**Maximum pre-rendered frames: 2**

**Power management mode: Prefer maximum performance**

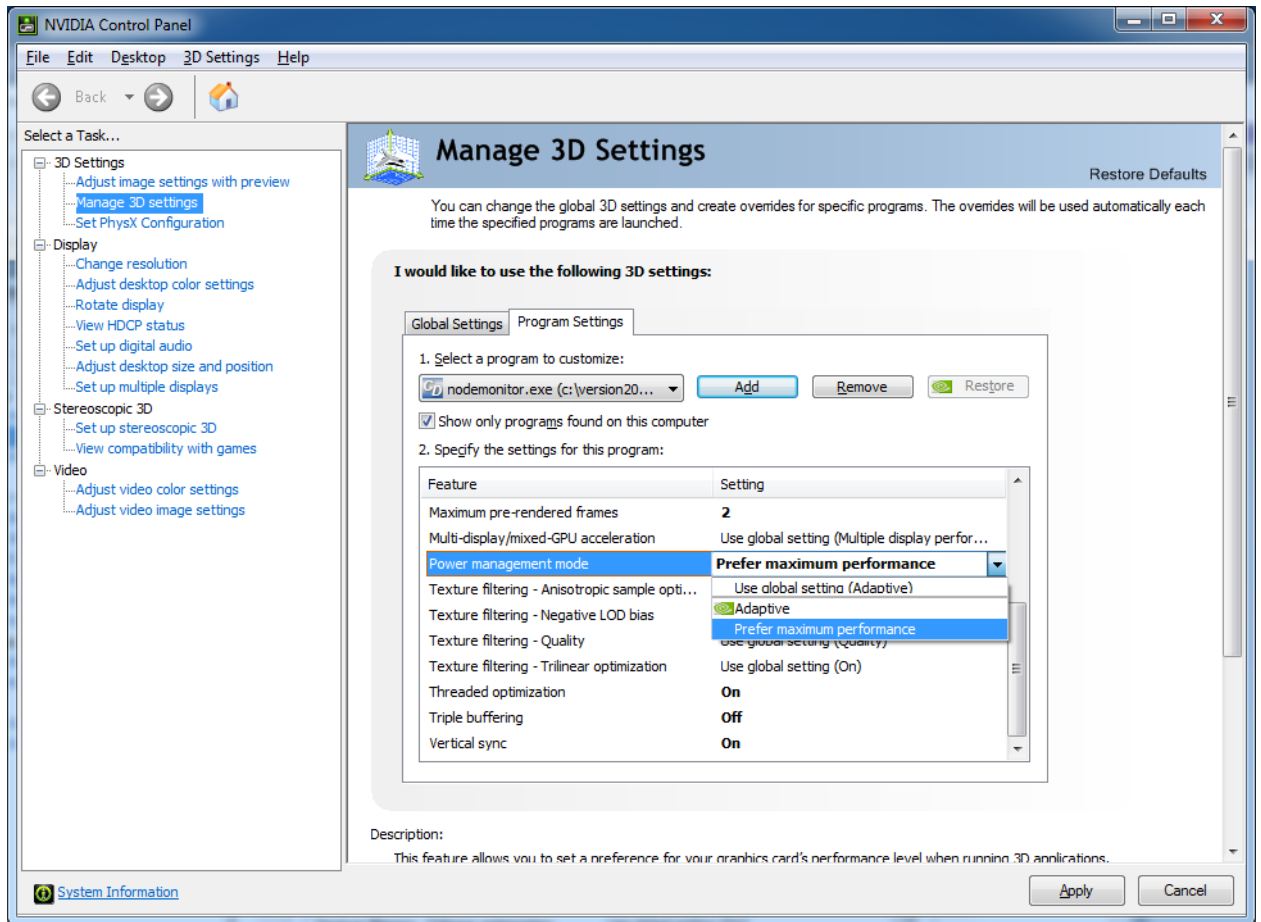

**Threaded optimization: On**

**Triple buffering: Off**

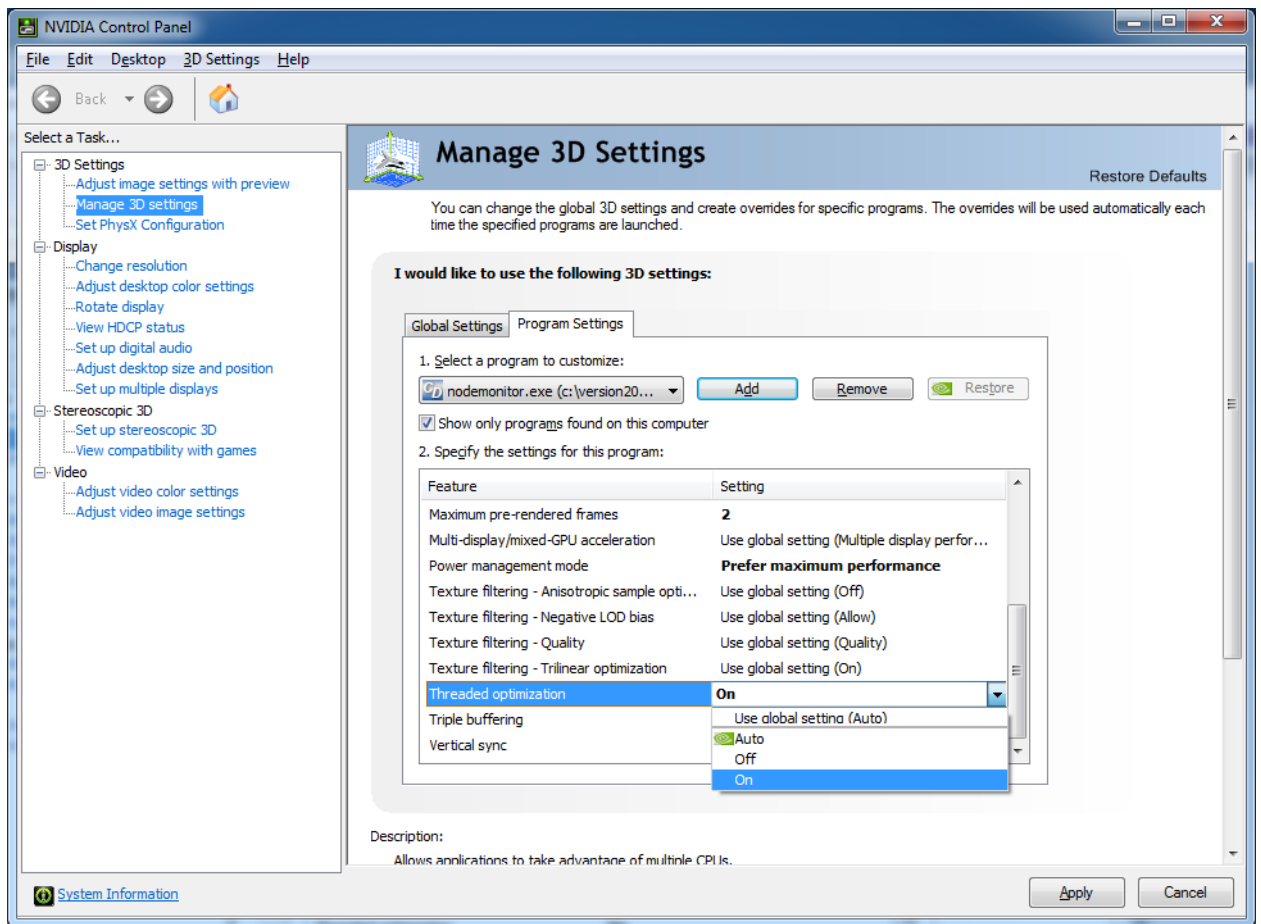

**Vertical sync: On**

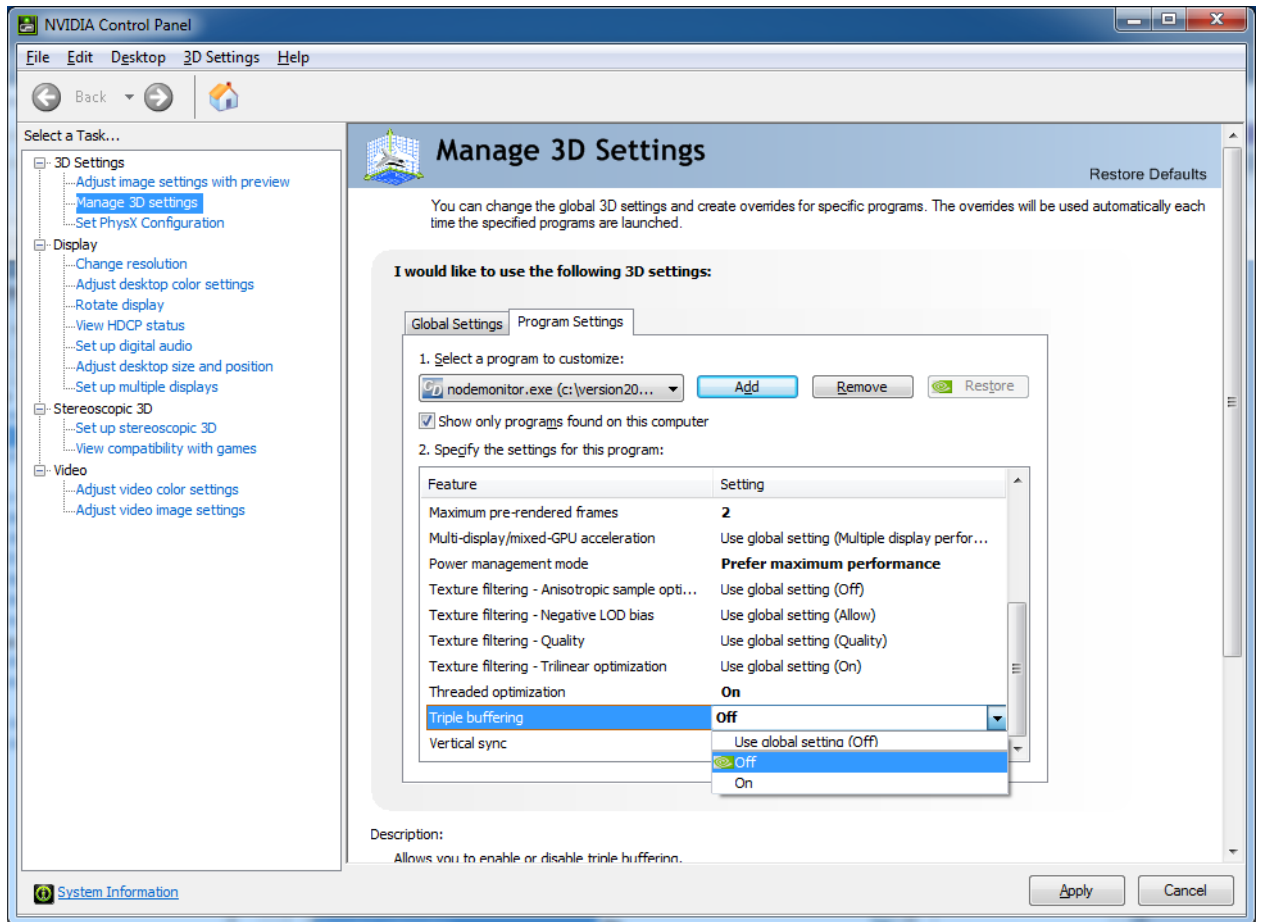

**Maximum pre-rendered frames: 2**

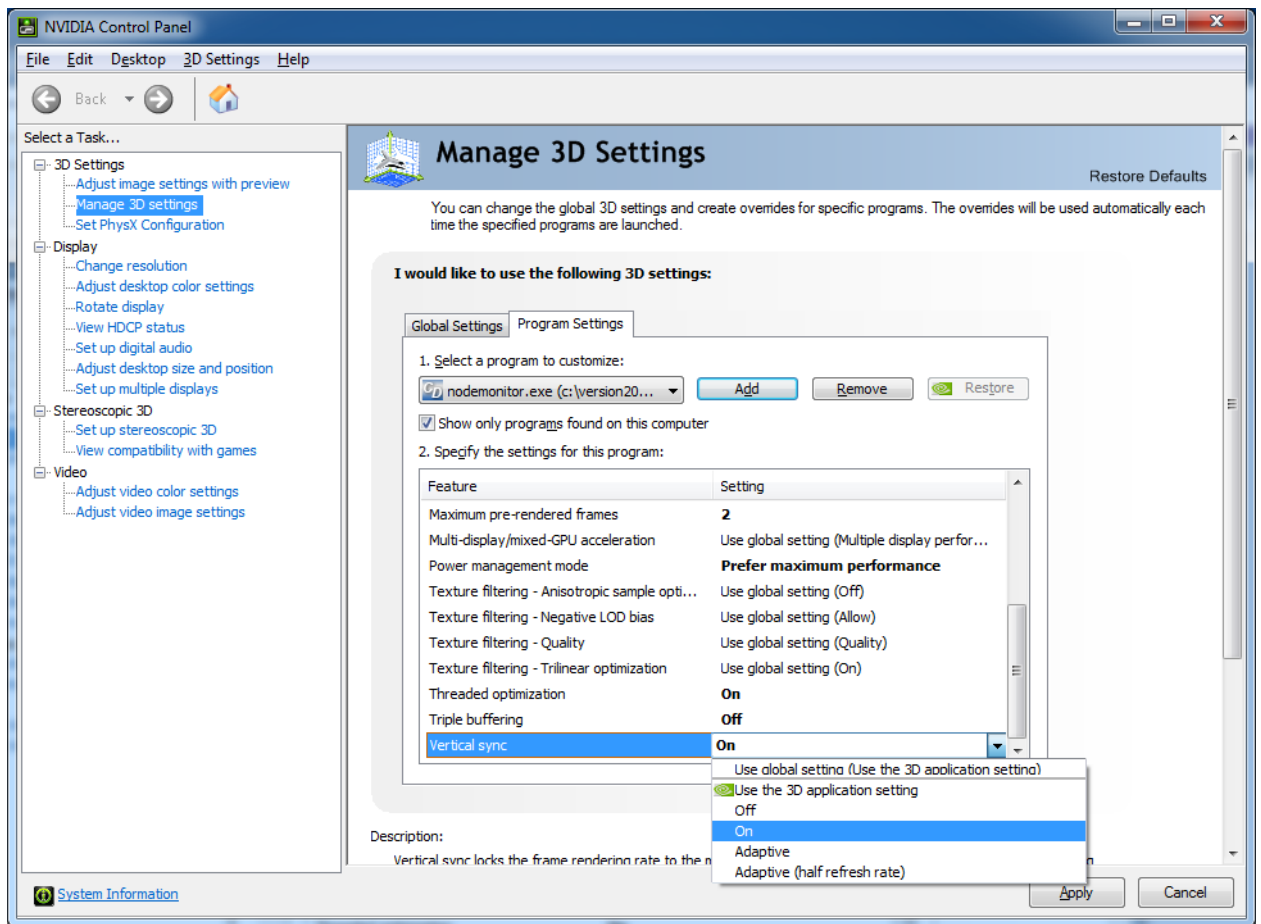

**Power management mode: Prefer maximum performance**
